soul-shell.com

Regular Price:
$9.99 dlls

Description

More than words is a conversational game where you can chat with an Artificial Intelligence powered by GPT NEO natural language processing technology, you can have a full conversation with Marian Anderson.

History

In a dystopian world the manufacture of androids is a priority to human survival.

Marian Anderson is the first android created by the Soul Shell Corporation, and it requires you, a normal volunteer, to test Marian about her intelligent behavior in the basement of the lab.

Will she be able to convince you that she is as human as you? Could she have feelings?

Features

- Offline and private conversation
- Feeling test mode
- QA test mode
My name is Marian.

Marian: Welcome to 2 Corporation.
Marian: The 2 Corporation is a high-tech firm primarily focused on the production of androids known as replicants.
Marian: My name is Marian Anderson, a GPT RED model replicant.
Marian: Please don't close the program, wait a moment until my artificial neural network is fully loaded in the kernel of my brain.
Marian: For the moment I will give you information about myself.
Marian: I have no restrictions on the topics I can discuss, be careful, please, let's try to be nice to each other.
Marian: I am the first test artificial model and I hope to accomplish with your expectations about my intelligence and empathy.
Marian: As with all language models, it is hard to predict in advance how I will respond to particular comments and offensive content may occur without warning.

User: How old are you?

Marian: Twenty-three years.
